## 610MM X 75MM ABRASIVE BELT BY KLINGSPOR

Klingspor portable sanding belt LS 309 XH – designed especially for portable belt sanders

The **portable sanding belt LS 309 XH** by Klingspor is a product that has been engineered especially for use with portable belt sanders. Available with a large range of grit sizes, this portable sanding belt is suitable for a multitude of sanding tasks. It is capable of handling a host of different materials, especially wood, metal and NF metal as well as paint, varnish and filler.

This versatility makes this portable sanding belt a truly universal product. The belt has been designed for use in such market segments as the wood and metal processing industry as well as commerce. The portable sanding belt ships in the form of abrasive belts and can be used on **hand tool belt grinders** or **portable belt sanders**. The product is available in a large number of grit sizes. Do-it-yourselfers and hobby craftsmen will also benefit for their applications thanks to the exceptional properties this top-notch product has to offer.

Premium portable sanding belt for demanding tasks  
The **portable sanding belt LS 309 XH** is a universal product for rough, intermediate and finish sanding. This product allows the user to complete a variety of tasks with one single belt. This practically eliminates the need for replacing the portable sanding belt between the individual work steps. The extensive in-stock range ensures that the customer will find the belt that matches their machine perfectly. The same holds true for the joints. Klingspor offers portable sanding belts with a diverse selection of belt joints

in order to ensure the greatest possible compatibility with sanders of all different kinds.

Portable sanding belt LS 309 XH: high-quality materials and workmanship

The stand-out features of the portable sanding belt made by Klingspor are impeccable workmanship and unrivalled durability. To ensure the best possible results, grain, backing and bonding are tailored specifically to the material that will be processed. The same applies to the **portable sanding belt LS 309 XH**. The product is made with synthetic aluminium oxide, which is of supreme quality and applied with a close coating. The stock removal rate is excellent in all conditions of use. The bonding for this product is established with premium fully synthetic resin, while a **tear-resistant backing** guarantees the necessary durability.
