BLACKSTONE SILICONE GRINDSTONE SB-250 BY TORMEK

SKU	Option	Part #	Price
8706224		SB-250	\$465

Model	
Type	Water Cooled / Wet Stone Sharpener Accessory
SKU	8706224
Part Number	SB-250
Barcode	7392485001188
Brand	Tormek
Packaging + Shipping	
Shipping Weight (Gross)	1.48 kg

Features:-

Shapes and Sharpens HSS and Exotic Alloyed Steels

Can Touch Up Tungsten Carbide

Does Not Offer Faster Steel Removal on Ordinary Carbon Steel

Works Efficiently on Low RPM

Offers Exceptional Wear Resistance

Many owners of the T-7 and Supergrind 2000 want to shape and sharpen exotic alloyed tools, which is exactly what this Tormek Blackstone Silicon grinding wheel was developed for.

For high speed steel, large bevel surfaces (where grinding pressure is limited), and even touching up Tungsten Carbide, you can do no better than the combination of abrasive hardness, shape and grain size we've developed for this sharpening wheel. The small, sharp grains remove hard steel efficiently, even (as stated previously) at low grinding pressure. The 220-grit size will be familiar to anyone who's used the original grindstone that came with their tool, but this can be altered to work like a 1,000-grit stone (using Tormek Stone Grader SP-650). It's built to last, with the Blackstone Silicone offering exceptional durability. Please note: this is for your exotics and specialized sharpening. It does not offer faster steel removal on ordinary carbon steel. For that, you can utilize your original wheel. But for the specialized sharpening, this the one you want.
