DOMINO Verticle Stop Attachment by Festool

Additional Stop Replacement part for DOMINO Joiners. The Base Support Bracket now includes integrated index stops, providing accurate reference points for mortising near the edge of a workpiece. This is particularly useful for narrow workpieces. When using the flip stops, the center of the cut is 20mm (25/32") from the edge versus 37mm (1-15/32") without. The flip stops offer optimal flexibility when using the new 4mm Domino cutter and tenons.
