Dimensions	
Product Length	230 mm
Product Width	41 mm
Product Height	43 mm
Packaging + Shipping	
Shipping Weight (Gross)	2.51 kg

The key to a perfect result is having maximum control over your project, so do it all with just one tool. Tackle even the smallest and most detailed tasks in awkward and tight spaces. With 5,000-35,000 RPM variable speed control and separate on/off switch, you will always be able to pick up your project right where you left off. Together with the high-performance motor, the electronic feedback consistently gives you maximum force. The slim, ergonomic body design provides a comfortable 360-degree grip zone no matter how you hold it for extended use.

The Dremel 4000 also features the EZ™ Twist nose cap with an integrated wrench that allows the nose cap to be used as a wrench to tighten accessories and eliminates the need for a separate wrench. This feature makes accessory changes up to five times faster than using the standard wrench and ensures you'll always have your wrench at hand.

### Features:-

The increased strength of its motor and electronic feedback circuitry enables consistent performance at all speed levels. With the EZ™ Twist nose cap, there is no need for a separate wrench.

Ergonomics includes a slim design that provides a 360-degree grip zone for added comfort and control.

Control the rotary speed from 5,000 to 35,000 RPM with the variable speed dial for maximum precision.
