Shipping Weight (Gross)	1.48 kg

The 100mm Josco Multi-Thread Bevel Brush is ideal for surface preparation and the removal of paint and rust. Manufactured using twistknot HD steel wire, it is suited to heavy duty brushing applications. The brush is made very easy to use and fit onto all angle grinders, as it comes with a quick change multi-thread.

To get the best results, use the bevel brush at an angle to the work piece. You will only need to brush with the tips of the wire to see results, plus excessive pressure will cause the wire to break.

Use with M14 Drill Adaptor BDBPA for use in a drill.

Please note: this brush is not intended for use on stainless steel or aluminium, as it may cause rust contamination. For a brush that can be used on these surfaces, please use a multi-thread bevel brush with stainless steel wire instead.

Specification

Subsegment: Bevel Thread: Multi-Thread

Material Type: HD Steel Wire

Maximum RPM: 12,000
