Packaging + Shipping	
Shipping Weight (Gross)	1.25 kg

Over 97% Dust Collection & Stable Front Guide

The specially designed dust flow inside of the shroud enables CYCLONE to collect more than 97% of the dust during the work. *

The new designed Front Guide always keeps CYCLONE stable in any situation - not only in normal cutting, but also grooving, and tuck-pointing.

*when using the vacuum over 1000W, with the maximum cutting depth.

Easy Blade Change (EBC) System

With our patented EBC system, the blade can be changed with just one operation, no need to detach the Angle Grinder from CYCLONE anytime.

Cutting Depth Adjustment

Just by operating the Knob screw on the front, cutting depth can be set in any length from 5mm up to 33mm. *

*when using 125mm blade.
