Features:-

Coated Die cast Aluminium alloy head, Rubber grip and Nylon faces.

The Die cast Aluminium alloy head is fitted with screw in white Nylon faces or for certain specialist applications Brown Polyurethane.

A cavity inside the head is partially fitted with steel shot which adds to the weight, prevents rebound and delivers 'dead' blows of maximum force.

Faces are colour coded and can easily be replaced by hand.

Faces are designed to wear and are replaceable by hand.

Used, due to the easily interchangeable faces, as a multi purpose striking tool and is ideal for sustained and effective blows without recoil.

Commonly used in most assembly/fitting applications including engineering, toolmaking, shopfitting, partitioning, double glazing etc.
