Premium quality cutters have a tempered black oxide finish with improved properties and superior performance.

TITANIUM NITRIDE COATING. The Titanium Nitride coating significantly increases the tool life by providing the following benefits: - Increased surface hardness to 85HRC. - Ceramic surface, reducing friction by up to 30%. - Especially resistant to cold welding. - Suitable for cutting a wide range of materials. **M2AL HIGH SPEED STEEL MATERIAL.** M2AL High Speed Steel is a high alloy material with a hardness of up to 67.5 HRC, designed for increased endurance of the cutting edge and tool life. **STEP HARDENED PROCESS.** This state of the art manufacturing process produces cutters with extremely hard tooth tips for increased cutter performance, while maintaining a softer body which is less susceptible to breakage than standard high speed steel cutters. **MULTI-CUT GEOMETRY.** Provides smooth and fast cutting, with decreased chatter. This also increases the cutters ability to remove swarf away from the cut, and helps to enhance centring. **FULLY GROUND WITH INTERNAL RELIEF.** This feature allows Holemaker cutters to produce reamed quality, burr-free holes, and also helps to reduce torque and horsepower requirements. **UNIVERSAL SHANK.** 19.05mm (3/4") Universal Shank with 2 flat sections to suit most magnetic base drilling machines.
