Packaging + Shipping	
Shipping Weight (Gross)	0.0 kg

FEATURES

The Vacforce 2000 consists of a vacuum base to clamp to the surface of the material and an air feed cylinder to push the cutting tool through the cut with less effort by the operator. It also incorporates a safety valve which prevents operation unless the unit is locked to the surface.

Due to the design, the surface to which the unit will adhere does not have to be smooth & flat. Surface imperfections are tolerated.
