### About this item:

3/8" x 16 BSW 1.5" Chrome Button Die

British Standard Whitworth (BSW).

Split circular chrome alloy button dies are most commonly used in conjunction with a die stock handle.

They can be used as thread chasers to clean an existing thread.

They can also be used to create a new male thread on non-ferrous metals and plastics.

Chrome alloy dies are not suitable for creating precision, safety or critical threads.

The BSW thread form was developed by Sir Joseph Whitworth in 1841.

The thread form has rounded roots and crests and is specified in BS84:1956.

The thread angle for BSW is 55° as opposed to 60° in Metric and Unified threads.
