Shipping Weight (Gross)	0.0 kg

Loksert keylocking inserts are an easily installed thread assembly that is ideal for replacing damaged or worn threads in virtually any material - ferrous, non-ferrous, and non-metallic.

They are constructed from high quality carbon steel or extremely hard wearing stainless steel.

One piece Loksert inserts are supplied with the dove-tailed locking keys pre-assembled.

The pre-positioned keys automatically position the insert at the correct depth below the surface of the parent material.

Lokserts are suitable for repairing and creating threads in a wide range of applications including forgings and castings
