Part Number	197356-1
Barcode	088381459563
Brand	Makita
Packaging + Shipping	
Shipping Weight (Gross)	1.48 kg

The Makita DC10SB has been specially designed for charging the new slide Li-ion Batteries for the Makita 12V Max CXT series. The DC10SB provides rapid charge times for the 12V MAX battery platform, being able to fully charge a 1.5Ah battery in 22 minutes. Stand-by time is greatly reduced as the DC10SB is equipped with a built in cooling fan. This fan effectively cools down every battery cell with the forced air cooling system. The DC10SB also includes a charging status indicator to show the charging status of the battery. This is shown in 2 stages; Less than 80% and 80% or more.

Features:

Compact and lightweight design

Forced air cooling system effectively cools down every battery cell

Charging status indicator - shows the charging status of a battery being charged in 2 stages: less than 80% and 80% or more

Multi-Contact Slide-type Terminal - Ensures stable contact with battery even under extreme movement
