MILWAUKEE SDS Plus MX4 Drill Bits have symmetrical 4 cutter geometry (4 x 90 °) & perfect round holes for optimal anchor fitting. The high volume 4 flute geometry ensures the optimum removal of dust and debris. There is a centering tip for easy spot drilling with pinpoint accuracy. A welded solid carbide tip on Ã, 5-10 mm allows for wider flute entrance leading to increased speed. More carbide leads to a higher durability of the tip and higher lifetime. The 4 breaker points pulverize material more efficiently for faster drilling, Enhanced rebar guards for an improved resistance when hitting rebar. New variable flute design has a thin flute at the tip for maximum debris extraction, higher speed and less friction. Thick flute at the base for higher stability and reduced bit breakage. Up to 20% more holes per battery charge vs 4 cutter drill bit in concrete and vs. previous generation. Features:

Symmetrical 4 cutter geometry 4 x 90 °: Perfect round holes for optimal anchor fitting.

4 Flute Geometry: The high volume 4 flute geometry ensures the optimum removal of dust and debris.

Centering tip for easy spot drilling with pinpoint accuracy. Welded solid carbide tip on 5-8mm: Allows for wider flute entrance leading to increased speed.

More carbide leads to a higher durability of the tip and higher lifetime.

4 breaker points pulverise material more efficiently and allow the bit to be up to 20% faster than the competition. Enhanced rebar guards for an improved resistance when

hitting rebar. New variable flute design: Thin flute at the tip for maximum debris extraction higher speed and less friction.
