The MILWAUKEE Vacuum Drill Bits reduce airborne silica dust and provide increased productivity during the chemical anchor preparation process. The combination of dust extraction holes at the bit tip and the hollow shaft design allow dust to be removed through the bit while drilling holes, reducing airborne silica dust in the process. Additionally, Vacuum Drill Bits leave clean holes which are ready for the chemical anchor installation, removing the need to use standard drill bits with the 'blow-brush-blow' cleaning method, delivering up to 2x faster chemical anchor preparation. The 4-Cutter tip design delivers durability in concrete and concrete with rebar applications. The universal adapter fits most common dust extractor attachments.

Features:

Faster and more efficient drill bit due to effective dust removal.

Efficient drilling without dust for a safer and cleaner working environment.

Active drill bit head cooling for longer life.

4 cutter design prevents the drill bit from jamming into the rebar.

Accurate concentricity and high dimensional accuracy drilled holes, according to PGM Conformity.

Universal connector for all common vacuum cleaners with hose diameter 32-38mm

Specifications:

Useable Length: 400mm
