| Shipping Weight (Gross) | 25.0 kg |
| Forklift / Tail Lift to Unload is Highly Recommended | ✓ |
| Shipping Notes | This product is classified as 'Heavy / Oversized' and generally does not qualify for FREE SHIPPING. |

The TradeQuip "Made for the Trade" Soda Bi-Carbonate Blasting Media Abrasive is designed for use in conjunction with our TradeQuip Mobile Soda Blasting Kits. Soda Bi-Carbonate blasting media has non abrasive properties which makes it a very universal blasting media which can be applied to lighter materials such as aluminium, plastic, fibreglass, wood etc. Soda Blasting does not damage glass, rubber, chrome items if they are left on a vehicle for blasting. Soda Blasting leaves behind a thin protective film which, if left untouched, will prevent surface rust from forming on bare steel surfaces for up to 6 weeks or even longer if stored in a dry, protected area. This film must be removed before painting by wiping down with acetone dampened microfiber cloths or suitable lint-free towels. Only use acetone to wipe residue. Wipe off soda residue, rinse often and immediately follow up with a dry lint-free towel. Any soda media left in body seams or crevices can be removed with a small shop vacuum and a fine tipped blow gun. Be sure to wipe surrounding areas as described above. This TradeQuip "Made for the Trade" 22.68kg bag of Soda Bi-Carbonate is manufactured in Colorado USA. It has been specified for use with TradeQuip "Made for the Trade" soda blasting equipment. **Features:-**

- Fast removal of medium rust and paint
- Low consumption rate
- Water Soluble - eliminates media residue concerns; simplifies clean-up & disposal; less solid waste generated
- Safe to use on virtually any substrate, including delicate surfaces, rotating equipment & moving parts
