

CHROME BUTTON DIE, MC, 1" BY BORDO

About this item:

Metric Coarse.

Split circular chrome alloy button dies are most commonly used in conjunction with a die stock handle.

They can be used as thread chasers to clean an existing thread.

They can also be used to create a new male thread on non-ferrous metals and plastics.

Chrome alloy dies are not suitable for creating precision, safety or critical threads.

Metric Coarse button dies and die nuts have a 60° angle of thread.

The crest is flat and the thread has clearance at the root allowing external thread and internal thread to engage well.

Larger root radius and lower thread height enable easy screw thread processing and increase thread screw strength.

SKU	Option	Part #	Price
35376	Size: 10 x 1.5mm	4800-10-1D	\$19.24
8600026	Size: 12 x 1.75mm	4800-12-1D	\$21.84
