The Weldforce WF-205MST is not your standard portable multi-function MIG. Boasting 200A @ 30% output, this unit has the grunt and an impressive range of features to get the job done and save time and money. Work in manual mode, or synergic (select the material and thickness, and the machine takes care of the settings). PFC technology means the WF-205MST is incredibly power efficient, giving it more duty cycle and making it an excellent choice for use on long extension leads (up to 100m) and/or use on generators. Stick/MMA & lift-TIG capability, job save & recall, geared drive system, fan-on-demand to reduce dust intake, spool gun ready, advanced Stick and TIG functions... and too many other features to list here! Comes with 4m heavy-duty Euro-fit MIG torch, 2-stage gas-saving regulator, 0.8/0.9mm drive rollers for gas, gasless & aluminium wire, 4m earth and stick leads, 15A plug fitted, cable strap, and large carry bag. Maximum recommended MIG welding capacity of 10mm (mild steel).
