Features	
Standard Inclusions	Excludes 9V Battery (Required to Operate the Tool)
Packaging + Shipping	
Shipping Weight (Gross)	1.15 kg

Lumber Wizard 5, the much anticipated newest version of Wizard Industries' flagship woodworking metal detector, is now available at Woodcraft. Lumber Wizard 5 is a powerful precision handheld metal detector designed specifically for woodworkers to help detect small metal objects hidden inside new and used lumber. The Lumber Wizard 5 features automatic tuning that allows easier use and finer tuning for more precise detection.

Whether it's an old embedded nail left over from an abandoned tree fort, or lead shot in a tree harvested from hunting grounds, hidden metal inside your lumber can present a danger to both you and your equipment. The Lumber Wizard™ 5 woodworking metal detector helps protect both you and your expensive tools and blades by detecting nails, screws and staples before you run them through your equipment. Just pass the handheld detector over your wood and it emits both audible and visible alerts including a laser light if metal is detected. This version features automatic tuning/calibration, meaning there is no need to tune it before use - a huge time saver that also ensures better reliability and more precise detection.

Features

- Fully automatic tuning
- Bright laser-line indicator
- Helps pinpoint nails, screws, bullets and wire inside lumber
- 6"-wide scanning area
