254MM TABLE SAW WITH SAWSTOP TKS 80 575782 BY FESTOOL

SKU	Option	Part #	Price
8726709		575782	\$3999

Model	
Type	Table Saw
SKU	8726709
Part Number	575782
Barcode	4014549342831
Brand	Festool
Size	254mm (10")
Technical - Main	
Power Source	240V 50Hz Single Phase
Dimensions	
Product Weight (Net Weight)	37 kg
Packaging + Shipping	
Shipping Weight (Gross)	37.0 kg

Every year approximately 4,000 people are injured on circular saws, corresponding to 16 injuries per working day. Around 26% of serious accidents even result in an accident pension (German Social Accident Insurance (DGUV) statistics 'Accidents at work 2017).

With the new TKS 80 table saw, the risk of most serious cutting injuries during sawing is reduced. While you concentrate on your work, we protect your most valuable tools - your fingers.

Features:

Cross-cutting up to a width of 820 mm with sliding table, at a cutting depth of 20 mm

Rip cutting up to a cutting height of 80 mm and a width of 600 mm with an extension table

Tilting saw blade for angled cuts between -2 ° and 47 °

Note: The TKS 80 is excluded from Festool's 30 Day Money Back Guarantee.

Integrated SawStop technology

The risk of serious cutting injuries is reduced.

**Responsive sensor**

If the saw blade comes into contact with the users skin, it is stopped within 5 milliseconds and disappears into the work surface.

**Intelligent cartridge**

A cartridge releases a pretensioned spring and pushes an aluminium block into the saw blade. After being triggered, the cartridge is replaced in just a few steps.

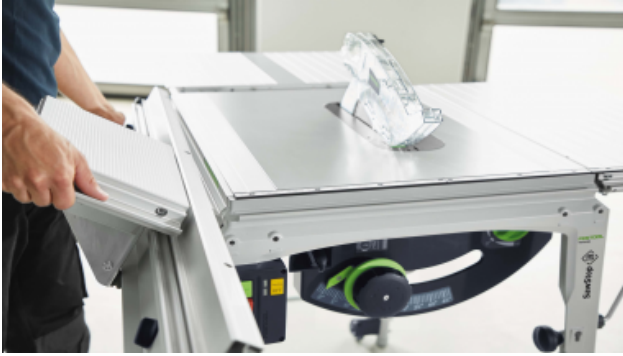

**Flexible cutting height**

Flexible cutting height up to 80 mm for larger cross cuts.

**Maximum precision**

Fewer splinters on the upper surface of the material in mitre rip cuts by swivelling the saw blade to the left. More space for

your hands and a clear view of the workpiece.

Comprehensive system accessories

Work surface can be extended in its length and width. Sliding table for cross-cutting up to 920 mm.

Bypass option

SawStop technology can, if necessary, be deactivated. This means that even conductive materials can be machined using the saw.

Precise cuts

With locking positions and fine adjuster, can also be used for cross cuts and rip cuts.

Healthier working with a system
