## 1L (0.5L RESIN + 0.5L HARDENER) KRAFT KOTE HIGH GLOSS EPOXY RESIN 36049 BY KIRKSIDE

Kraft Kite is a self levelling, high gloss 2 part epoxy resin. It is a highly versatile liquid coating that hardens to produce a thick, clear, durable and glossy finish. Kraft Kote should be mixed by volume with equal parts of resin and hardener in a clean, plastic measuring container. The product sets quickly and produces a hard finish when cured. The kit contains equal quantities of resin and hardener. 1L of Kraft Kote covers approximately 1.1m<sup>2</sup> of surface area. **Instructions:-**

Make sure the surface of the tabletop is clean, free of oils, solvents and dust.

We recommend placing a cover above your timber to protect from dust particles.

Thoroughly mix equal parts of resin and hardener in a clean container.

Pour the mix onto the surface and spread with a clean, high quality brush.

Use a heat gun to draw bubbles to the surface.

Lightly brush over the liquid to spread.

Leave to cure.

\$75 inc. GST
