The TLM hole marker is a treasured accessory for many experienced tradesmen. This practical, mechanical pencil quickly and easily marks drill points in holes up to 45 mm. The variously colored refills can be sharpened using the pencil's integrated sharpener. The TLM fits into any toolbox and can be clipped to pants and to shirt pockets with the sturdy mounting clip. The new TLM2 is now also available, complete with an impressive and ingenious new feature. The screw-on, ABS plastic attachment converts the hole marker into a comfortable, mechanical pencil for marking, writing and drawing on a wide range of materials and surfaces. The TLM2 is not just a pencil or a hole marker. The TLM2 is a pencil with multiple functions. With the screw-on attachment made from ABS plastic, the TLM2 hole marker fits comfortably in the hand and is ideally suited for the precise marking and writing. Remove the attachment, and the long, stainless steel tip enables high-precision marking in hard to access areas – for instance, drill holes during assembly work. **Features:-**

Removable attachment transforms the DHM into a propelling pencil in seconds

Special design facilitates deep hole markings up to 45 mm (1.78" in depth)

Lead with small diameter for precise markings

Integrated sharpener in the push button

Rugged ABS belt clip for a secure grip
