Rusted or rounded heads on bolts are a frustrating problem and are traditionally difficult to remove. The Bordo bolt extractor set makes removing these damaged fasteners easy. This set covers 9 common socket sizes from 8 to 19mm and their chrome molybdenum steel construction ensures a long tool life even in the toughest conditions. The bolt extractor sockets feature a 3/8" square drive and are suitable for use with a 3/8" breaker bar or ratchet. Choose the bolt extractor that matches the size of the nut or bolt head. The tapered flats inside the socket grip the rounded hex as you undo the fastener. Use of a penetrating spray may help heavily rusted fasteners. **Features:-**
Heavy duty chrome molybdenum steel construction.
Standard socket 3/8" square drive.
Rated for use with impact drivers.
Clear and highly visible markings for quick socket selection.
Makes the difficult job of removing rounded or rusted hex head fasteners simple. **Set Includes:-**
8, 10, 11, 12, 13, 14, 16, 17 and 19mm sockets
