Packaging + Shipping	
Shipping Weight (Gross)	1.48 kg

Our Fibreglass Non-Conductive Bolt Cutters with PIVOTMOVE™ Rotating Handles are engineered to give users the best access when working with tight angles and are available in 457mm (18") and 600mm (24") sizes. The fibreglass bolt cutters are 1000V UL classified to provide added security and peace of mind for users on the jobsite, while the adaptable rotating handles allow you to make more cuts around obstacles common in utility environments. The forged steel bolt cutter blades are custom heat-treated for maximum durability. The Bolt Lock secures the pivot bolts to prevent loosening and lanyard holes are integrated through the handles for easy tethering. The 457mm (18") model also has slim ergonomic handles allowing for comfortable use in multiple orientations. **Features:**

UL Classified 1000V Insulation provides added safety for users, organisations and decision makers
 PIVOTMOVE™ Rotating Handles provide best access to make cuts in tight spaces
 Forged Steel Blades with custom heat treatment provides maximum blade durability
 The Bolt Lock secures pivot bolts to stay tight and last longer
