

13L ULTRASONIC PARTS WASHER 1037T BY TRADEQUIP PROFESSIONAL

SKU	Option	Part #	Price
8728743		1037T	\$1699

Model	
Type	Parts Washer
SKU	8728743
Part Number	1037T
Barcode	9332105010525
Brand	Tradequip
Size	13L
Dimensions	
Product Length	360 mm
Product Width	330 mm
Product Height	310 mm
Packaging + Shipping	
Shipping Length	360 mm
Shipping Width	330 mm
Shipping Height	310 mm
Shipping Weight (Gross)	14.0 kg

The **Tradequip "Made for the Trade"** ultrasonic parts cleaner makes it easy to clean items like carbies, calipers, nuts & bolts, most small metal parts - even jewellery. Just fill the cleaner with water, mix in a desirable ultrasonic cleaning additive (sold separately), set the timer and walk away to get on with another job. The ultrasonic cleaner works with or without heat and provides deep cleaning using ultrasound technology and water. The adjustable temperature and timer gives you a variety of cleaning performance options. All **Tradequip "Made for the Trade"** ultrasonic parts cleaners incorporate Lateral Oscillation Technology for fast and effective cleaning results. The internal basket system allows the lid to seal the working solution avoiding evaporation and reducing ultrasonic acoustic levels. The clear and easy design with compact and quiet operation make these products the market leaders. All Tradequip tanks are manufactured from professional 304 grade 2mm stainless steel, with added thickness and increased corrosion resistance to alleviate problems associated with the use of citric acid. **REGULAR CLEANING IS A MUST!** Failure to do so may void warranty. Electropolishing passivates stainless steel to a greater extent than any other process. It applies an invisible protection oxide fill on the surface which imparts a condition of maximum resistance to attack and corrosion. The tank is fitted with a convenient drain valve to empty and thoroughly clean any traces of cleaning solution and contaminants that are left over from cleaning cycle. This should be carried out at the end of each cleaning cycle and the tank be stored

empty, clean and dry. Particularly useful for mechanical, panel repair, small engine, electronics, jewellery, metal parts, assemblies, optical, electronic tools, circuit boards and other high performance cleaning applications. The **TradeQuip "Made for the Trade"** ultrasonic parts cleaner is the most effective and efficient method for object cleaning slits, grooves, deep hole, blind hole, surface cleaning, removing oil, rust, oxides, etc.

Please note: Dependant on the setting of your temperature, solution ratio and power level, a cool down period of up to 30minutes may be required between cycles. Dependant on your application, complete cleaning result and cool down period requirements will vary. To reduce cycle times, use hot water at around 50 °C instead of cold water.

Recommended TradeQuip Cleaning Fluid All TradeQuip spare parts available in Australia!

Features

Adjustable timer from 1 to 30 minutes for perfect results
Cleaning basket included for cleaning batches of smaller parts
Remove more dirt with 20 to 80 °C adjustable temperature
Sound-reducing cover
For use with water base solutions
High ultrasonic power for more cleaning action
Easy to read digital timer
Heated water function for improved cleaning when needed
Professional electroplated tank
Turbo ultrasonic power option to meet more cleaning needs
One-button power switch on the back, double security
Time setting: 0-30 minutes can be adjustable
Adjustable temperature control
Innovative heating mode, match thermostat sensor, improves the cleaning effect
New prevent water leak technology, guarantees product safety and service life
High efficiency conversion circuit, ultrasonic performance than similar products more than 20%, higher cleaning efficiency
Cylindrical LED light display for time and temperature adjusting
User-friendly and clear panel
304 Grade stainless steel tank
High-performance transducer systems
All spare parts available!

Specifications

Tank Capacity: 13 Litres
Ultrasonic Power: 300W
Ultrasonic Frequency: 40KHz
Ultrasonic Transducers: 6x50W
Heating Power: 400W
Heating Temperature: 20-80 C
Timer Range: 0-30 Minutes
Tank Material: 304 Grade 2mm thick
Tank Size: 330(L) x 300(W) x 150(H)mm
Internal Dimension of Basket (including handles): 290 x 260 x 90mm
Dimensions: 360(L) x 330(W) x 310(H)mm
Carton: 520 x 420 x 420mm
Weight: 13.5kg

hello@beyondtools.com

Intended use Ultrasonic Parts Cleaners are designed to use high frequency small bubbles in a cleaning tank to remove contaminants on a variety of parts and even debris embedded in tiny cracks and crevices. **Warning REGULAR CLEANING IS A MUST! Failure to do so may void warranty.**

This unit is a technologically advanced piece of equipment.

This is **not** a Degreaser

This is **not** a Parts Washer. Dirty Fluid & Sediment build up on the base of the tub **will** lead to premature failure of the Heating Element & Transducers

This unit requires emptying & cleaning between used to ensure the Heating Element & the Transducers can function as per specification

Print version Owners Manual Product Guide *Critical Information*

What is Ultrasonic Cleaning? Ultrasonic cleaning is based on the cavitation effect caused by high frequency ultrasonic wave vibration signal in the fluid. Microscopic bubbles are formed, and they implode violently causing the cavitation which creates an intense scrubbing action on the small enough to penetrate microscopic crevices, cleaning them thoroughly and consistently. Ultrasonic cleaning is extremely effective at removing dirt and grime which would normally require tedious manual cleaning by hand. This unit can be used to clean a wide variety of instruments and mechanical parts such as carburettors, returning them to almost 'like new' condition without damage to delicate parts.

Ultrasonic Cleaning Applications?

Decarbonise and remove gum from carburettors

Cleaning fuel injectors

Degrease cam shaft, cylinder head and engine block components

Cleaning metal, fabric and ceramic filters

Strip and clean hydraulic pump bodies and parts

Refurbish diesel pumps

Diesel particulate filters

Remove sludge from pump components

Clean and degrease outboard and motorcycle heads and barrels

Removing carbon, grease and sludge from intake manifold components

About the TradeQuip brand

Our **Flagship** brand of garage and workshop equipment,

TradeQuip is designed for use in a demanding **garage and workshop** environment by trade users. With proven and trusted '**Made for the Trade**' reliability, **TradeQuip** branded products offer the very best in performance for an affordable price. The **TradeQuip** range is covered by a **12 month trade use warranty**.
