The M12™ FORCE LOGIC™ Press Tool is one of the single lightest press tools in the market today and represents a new level in portability and accessibility around installed pipe. Featuring a one-handed, in-line design, the M12™ FORCE LOGIC™ Press Tool will operate nearly anywhere you can fit your arm. Utilising REDLINK™ technology, the press tool monitors the force output to ensure quality connections and provides the user with peace of mind by visually indicating both a secure connection and when the tool needs calibration. Featuring advanced calibration, the tool only requires a service every 32,000 crimps. This allows users more connections between services, keeping the tool on the job site longer. When used with M12™ FORCE LOGIC™ Press Jaws this tool delivers quality press connections. Powered by the M12™ REDLITHIUM™-ION battery means the user is able to cut, fasten and connect on one system. **Features:** Balanced, in-line design suitable for one-handed use. Press indicator provides visual assurance of a quality connection. Industry leading 32,000 cycles between calibration inspections. Interchangeable jaws enable quick adjustments from 1/2" - 1-1/4".
