

1400W 70MM PLUNGE ROUTER IN SYSTAINER 1400 EBQ-PLUS 576211 BY FESTOOL

SKU	Option	Part #	Price
8729504		576211	\$1499

Model	
Type	Router
SKU	8729504
Part Number	576211
Barcode	4014549358641
Brand	Festool
Technical - Main	
Motor Power (Input)	1400W
Collar Diameter	6 mm - 12.7 mm
Motor Speed - No Load	10,000 - 22,500 rpm
Dimensions	
Product Weight (Net Weight)	4.5 kg
Packaging + Shipping	
Shipping Weight (Gross)	1.48 kg

Features: The handy multi-talent: The OF 1400 router weighs just 4.5 kg – one of the lowest machine weights in its class. The 70 mm routing stroke is impressive when making recesses for fittings or routing with templates. It also has a comprehensive set of equipment that enables it to master virtually any routing task. **Main Applications:** Rounding, chamfering, rebating and profiling edges

Routing circles and cut-outs with the multi-routing template
Grooving rear panels or recessing dovetail batons with the guide system
Routing with the routing aid to fit Schallex, draft excluders or espagnolettes

Routing mineral material (max. cutter \approx 45 mm)

Faultless precision

The OF 1400 is clamped to both guide columns. This means that the router is secured in place with absolute torsional rigidity. The routing result is perfect. Time-consuming rework is a thing of the past.

70 mm routing stroke

Because of the long 70 mm routing stroke, working with large routing depths and templates or making recesses for fittings is particularly easy.

Precise fine adjustment

The OF 1400 router has a precise depth adjuster. It takes just a few seconds and minimal effort to finely adjust the routing depth accurate to a tenth of a millimetre using the dial.

Clean and healthy work

For an unobstructed view of the workpiece and a healthy working environment, the OF 1400 has an integrated extractor connector. Simply connect a mobile dust extractor from Festool for clean work.

99% dust extraction

The unique chip deflector ensures efficient dust extraction and guarantees maximum suction power when routing edges in combination with the dust extraction attachment and a Festool mobile dust extractor.

Easy handling

The on/off switch and infinite speed adjustment can be operated without changing your grip. This means that the OF 1400 sits safely and securely in your hand at all times.

Lightweight, handy, safe

Low weight & low exertion: Even when routing edges, the light weight in combination with the ergonomic rod handle is ideal for guiding the OF 1400 router safely by hand.

Parallel side fence attached in an instant

Both guide rods are fixed in place at the same time via a single rotary knob. The parallel side fence can thereby be attached and detached in no time at all.

Cutter replacement in seconds

The convenient spindle stop with rocker and ratchet principle allows you to change the router at the speed of light without removing the key.

Changes without using tools

You can change the copying ring without tools. One click to release the ring & replacing it is just as straightforward.

For quick device changeover

Thanks to the plug-it system, the device can be changed quickly & directly via the cable and not via the socket or extractor: One cable for all devices. And even if the cable breaks, it can be replaced quickly without any problems.

Quick-acting brake

The quick stop brake ensures optimal safety when routing and the OF 1400 comes to a stop in seconds.

Systems get it done

For perfect results, Festool offers you a wide range of cutters in HS and HW quality.

Includes:

OF 1400 W Plunge Router

D 1/4 inch Collet

D 1/2 inch Collet

Copy Ring D 30 mm
