The M18 FUEL™ HAMMERVAC™ 28mm Dedicated Dust Extractor features an inline design engineered to connect directly to and be power by the M18 FUEL™ 28mm SDS Plus Rotary Hammer with ONE-KEY™ (M18FHP-0). Utilising the same replaceable certified HEPA filter as other HAMMERVACS™, which filters 99.97% of all particles greater than 0.3 µm, means more compatibility on the jobsite. The built-in adjustable depth stop and ruler offer easy and precise adjustments. The dust extractor allows for drilling up to 28 mm in diameter and 203mm in depth. The M18 FUEL™ HAMMERVAC™ 28mm Dedicated Dust Extractor features the MILWAUKEE® AUTOPULSE Filter Cleaning Mechanism that automatically cleans the filter after each use, ensuring more effective drilling for longer before needing to empty the dust box. The translucent dust box comes equipped with a vacuum port that allows for no-exposure dust removal via a large vacuum or dust extractor (such as the AS30LAC).
