200MM DIAMOND WHEEL COARSE 360G SUIT T-4 DC-200 BY TORMEK

SKU	Option	Part #	Price
8730124		DC-200	\$405

Model	
Type	Water Cooled / Wet Stone Sharpener Accessory
SKU	8730124
Part Number	DC-200
Barcode	7392485006329
Brand	Tormek
Technical - Main	
Diameter	200mm
Packaging + Shipping	
Shipping Weight (Gross)	1.48 kg

Features:

- The DC-200 Diamond Wheel Coarse is designed to provide effective sharpening and rapid repair of a dull or damaged edge.
- The diamond wheel has a grit size of 360 for fast steel removal and is particularly useful for tool shaping.
- Fast steel removal to repair or reshape edges.
- Constant shape, always maintains the same diameter.
- Sharpens all types of steel and ceramic.
- Allows sharpening on the side of the grinding wheel to get a completely flat bevel.
- Exceptional durability with diamond, the world's hardest abrasive.
- A grinding wheel for all materials
- With this diamond wheel, you can sharpen nearly any type of material, including steel, ceramic and carbide.
- DC-200 Diamond Wheel Coarse fits Tormek T-4 Original, Tormek T-4 Bushcraft, Tormek T-3 and earlier models with a 200 mm diameter grinding wheel.
- **Simplifies repeat sharpening**
- All of Tormek's diamond grinding wheels have exceptional durability with a constant removal rate and shape, which means that they always stay round and flat with a full-size diameter.
- Users who often sharpen the same tool benefit greatly from this, as it simplifies both setting and grinding.
- **Get a completely flat bevel**
- The constant shape makes it possible to grind either on the side of the wheel or on its upper surface.
- Side grinding is perfect for smaller tools such as knives, chisels, carving gouges and v-tools.
- The result is an edge with a completely flat bevel, instead of a slight hollow grind.
- For sharpening on the side of the diamond wheels, we recommend using the MB-100 Multi Base together with the jig designed for your specific tool.
- Both the base and the jigs give you support and control throughout the sharpening process.
- **Rust protection for increased service life**
- All diamond wheels are supplied with 150 ml of ACC-150 Anti-Corrosion Concentrate.
- Always add the concentrate to the water when sharpening with water to prevent rust on the grinding wheel.
- Add 10 ml of concentrate to 250 ml water (~4%). We recommend always using water when sharpening diamond wheels, as it both prolongs the life of the wheel and provides a smoother grinding surface.
- It is also possible to sharpen without water.
