Warranty	5 Years
Packaging + Shipping	
Shipping Weight (Gross)	1.5 kg

The M12™ Stick Transfer Pump delivers maximum filtration for uninterrupted pumping in catch basins, water meter boxes, trenches, sump pump pits, and more. Featuring a 91 cm submersible aluminium barrel, this transfer pump provides the extension needed to reach water at the bottom of trenches and hard to reach areas. Equipped with HydroPass filter technology, the 360° filter maximises flow in heavy debris, minimising downtime caused by clogging. Powered by the M12™ battery platform, this water transfer pump eliminates repetitive manual pumping and improves control, requiring only one hand to pump, freeing the other to control the outflow. With a 4.6 metre max head height and an outlet compatible with a standard 19 mm garden hose, this pump delivers the power to push water farther - out of pits and basins, over walls, and to the ideal deposit location. Compatible with all of our M12™ REDLITHIUM Batteries this pump keeps you productive, effortlessly pumping up to 34 Litres per minute and 1,040 Litres when using a M12™ REDLITHIUM™-ION 4.0 Ah battery pack

### Features:

Pumps Up to 34 litres per minute with a maximum head height of 4.6m

19mm threaded outlet attaches to a standard garden hose  
91cm Submersible Aluminium Barrel provides extension and control to reach water in difficult to reach areas
