Warranty	3 Months
Packaging + Shipping	
Shipping Weight (Gross)	1.5 kg

The Milwaukee SDS Plus and SDS Max Dust Extraction Attachment, 5319-DE, provides users with a solution for containing respirable crystalline silica dust. The SDS Plus/Max Dust Extraction Attachment is optimised for all drilling depths and any hole between 25.4mm and 152mm. Its removable brush rings allows for drilling with larger diameters. The rubber seals ensure dust is contained within the attachment to prevent silica dust from spreading. The vacuum suction allows the dust shroud attachment to stick to a wall or the ground allowing you to easily and accurately drill.

Features:-

Captures dangerous silica dust while drilling concrete through the use of a dust extractor vacuum.

Removable Brush Rings for larger diameters.

Vacuum assisted suction adheres to even surfaces.

Rubber seal ensures dust containment.

Suitable for Core Bits ranging from 25.4mm-152mm.
