

15L M CLASS 18V CORDLESS MOBILE DUST EXTRACTOR BASIC CTMC MIDI 577067 BY FESTOOL

Comparable power to your corded version thanks to the 36 V turbine with 2 x 18 V battery packs (4.0/5.2/8.0 Ah). This makes it ideal for mobile sawing, sanding or drilling. Ideal combination with Festool cordless tools. Convenient and fast: The extractor switches on automatically via the Bluetooth® battery pack.

Switching on the extractor via the remote control directly on the suction hose saves you a trip to the extractor. Ideal for occasional cleaning tasks. Adjustable suction power in three levels. The appropriate level can be selected depending on the application, which increases the battery runtime.

With four battery packs and the TCL 6 DUO rapid charger, work can be done in most cordless applications without interruptions. Smooth and effortless. The suction hose will impress you with flexible handling and a long service life. It glides over every edge and possesses conical geometry for increased suction power.

The large internal hose holder makes it easy to stow the suction hose, ensuring safe and clean transport.

With the manual main filter and filter bag dedusting, the suction power can be quickly and easily recovered when the filter or filter bag is clogged. This significantly increases the fill level.

Quick, easy and tool-free. The attachable accessory case means that you have everything to hand. It offers space for additional battery packs and cleaning accessories (case available as an accessory).

hello@beyondtools.com

The cordless dust extractor is approved for harmful dust particles in dust class M with limit values $\geq 0.1 \text{ mg/m}^3$. It is suitable for the extraction of wood and mineral dust. The flat storage area on top of the hose holder can be used as a seat or as a shelf for working materials. Thanks to T-LOC, the extractor can be coupled with Systainers.

Main Applications:

On-site extraction for cordless tools for minor or brief sanding, sawing and drilling work

Ideal for mobile use in service and installation work and for final cleaning

Suitable for both wet and dry extraction (special wet filter required for wet extraction)

For hazardous wood dust and mineral dust from dust class M with limit values $> 0.1 \text{ mg/m}^3$

Practical remote control

Switching on the dust extractor via the remote control right on the suction hose saves you going to the extractor. Ideal for cleaning between work steps.

Working without interruptions

With four battery packs and the TCL 6 DUO rapid charger, you can work uninterrupted on most cordless applications.

Suction power adjustment

Suction power adjustable in three levels. You can choose the right level for your application, to extend the running time of the battery.

Smooth suction hose

Smooth, elastic and extremely tough. The suction hose boasts impressive flexibility, gliding over any edge.
