Always at hand, with no power cord. Systainer on the outside, cordless dust extractor on the inside. Our Systainer extractor gives you maximum mobility and independence with minimum weight – perfect for transporting and carrying over your shoulder. That makes it the right companion for service callouts and small jobs, and for spur-of-the-moment use. In dust class L/M, it gives you dust-free work without a power socket. It also impresses with very high suction power, thanks to its 36 V turbine and 2 x 18 V battery packs. And as usual, everything is fully compatible: the dust extractor, smooth suction hose, cordless tool, Systainer T-LOC connection. Perfect interaction between the cordless tool and the dust extractor is provided by the innovative Bluetooth® Autostart or the practical remote control.

For a system that's perfect in every way.
