Shipping Weight (Gross)	1.48 kg

Valved

Our N95 Valved Respirator is designed to help you stay safe from any chemicals or fine dust particles whilst on the job. The one way valve reduces the heat built up within the mask that leads to fogging on the lenses and allows for better heat dispersion. For added user benefit, all Milwaukee disposable respirators have a foam liner inside to provide comfort and a flexible nose bridge allowing you to achieve a better fit. Further, the secure staple-free welded straps help create a more comfortable fit. The N95 Valved Respirators are ideal for applications that include sanding, grinding and insulation particles.

All Milwaukee respirators are NIOSH N95 approved and meets 42 CFR 84 N95 filtration efficiency requirements. AS/NZS 1716:2012 'Respiratory protective devices', the standard for P2 respirators, and the NIOSH standard 42 CFR Part 84 for N95 respirators can be used as functional standards for both medical devices and for respirators that are not medical devices.

Non-Valved

Our N95 Disposable Respirator is designed to help you stay safe from any chemicals or fine dust particles whilst on the job. All Milwaukee disposable respirators have a foam liner inside to provide comfort and a flexible nose bridge allowing you to achieve a better fit. Further, these respirators feature two soft adjustable straps that help create a more comfortable fit and the straps feature a staple-free attachment method to the mask that reduces irritation from all-day wear. The N95 Disposable Respirators are ideal for applications that include sanding, grinding and insulation particles.

All Milwaukee respirators are NIOSH N95 approved and meets 42 CFR 84 N95 filtration efficiency requirements. AS/NZS
