The Richmond scissor lift table is essentially a 4-wheel hand trolley where the platform raises and lowers with the use of a hydraulically powered scissor mechanism. This scissor table lift has a multitude of uses in workshops, warehouses and despatch departments. Each table lifter is fitted with lockable castors and is operated with a foot controlled hydraulic pump in order to get what is on the table to a comfortable working height. They're also designed to ensure smooth lifting, with the lowering speed fully adjustable via a hand operated valve.
