Milwaukee® SDS Plus M2 2-Cut drill bits are the professional solution for fast drilling in concrete thanks to its innovative tip geometry and variable flute design. 3 offset aggressive breaker points on the tip demolish the concrete faster by creating micro cracks in the drilled material. The centering tip ensures immediate spot drilling with pin point accuracy. Moreover, enlarged rebar chamfers prevent side tip damage and reduce the risk of bit jamming when hitting rebar. The two variable flute design is thinner towards the drill tip for less friction that results in greater drilling speed and more holes per charge. Towards the shank the core gets thicker, ensuring full power transfer to the tip with lower vibrations and greater flute durability.

Features:

3 Breaker points: 3 offset aggressive power breakers demolish the concrete faster by creating micro cracks in the drilled material - noticeably greater drilling speed.

Carbide Centering Tip: Ensures immediate spot drilling with pin-point accuracy.

Rebar chamfers: Prevent side tip damage and reduces risk of bit jamming when hitting rebar.

Two variable flute design: Thinner towards drill tip for less friction providing greater speed and more holes per charge.

High volume flute geometry for optimum dust removal.

Tapered core strength: Core reinforcement towards the shank ensures full power transfer to the tip with lower vibrations and less flute breakages.

PGM rated: Certified hole accuracy for safe anchor installation.

Made in Germany.
