Type	Drill Driver
SKU	87433356
Part Number	576895
Barcode	4014549383360
Brand	Festool
Technical - Main	
Battery Voltage (V)	18V
Chuck Capacity	1mm-10mm
Packaging + Shipping	
Shipping Weight (Gross)	0.7 kg

Light, compact and impressively strong. The 18-volt TXS 18 compact screwdriver is your ideal helper for the most varied everyday work.

The classic T shape ensures easy handling and a short distance from the workpiece. A number of attachments find solutions for the most difficult applications – perfect also for narrow spaces or corners.

Fast tool change is secured by the FastFix interface and the CENTROTEC system. Clever details like the bit holder, the light control and the lid compartment Systainer³ make the TXS 18 a compact powerhouse with practical special equipment.

Impressive ergonomics and low weight for easy drilling and fastening.

The compact, handy shape makes work easier, even in cramped spaces.

Quick conversion to drilling, screwdriving, angular drilling and angular screwdriving without the need for tools thanks to the FastFix interface.

Numerous attachments for a variety of applications. All attachments of the current 18 V screwdrivers are compatible with the CXS 18 and TXS 18.

The depth stops and eccentric adapter also enable depth-limited screwdriving close to edges.

Long life also thanks to brushless EC-TEC motor.

Integrated magnetic bit holder.

The work area is optimally lit by LED lighting that can be switched on (in conjunction with a Bluetooth® battery pack, can also be controlled via the Work App)

For left-handed people, the Work App can be used to reverse the right-hand/left-hand selector switch such that the switch

no longer causes disruption by protruding into the handle area during the main application - in clockwise rotation (only in combination with a Bluetooth® battery pack).

Simply mobile: the TXS 18 comes in a handy Systainer³ and so can be seamlessly integrated into both vehicle equipment for easy transportation from the workshop to the construction site

13 torque settings and torque switch-off for precision fastening.

Robust belt clip that can be mounted on both sides.

Main applications

Furniture, fittings and kitchen assembly

Installation of skirting boards, boxes, lamps, curtains

Interior finishing

Manufacture of façade panelling and patio decks

Light and medium drilling and screwdriving in wood, metal and plastic

Drive screws into wood up to 6x240 mm

Drilling in wood up to 35 mm with Forstner drill bits

Short design

With a length of 14 cm and a height of 22.4 cm (incl. 3.0 Ah battery), the TXS 18 is extremely compact.

Powerful 18 volt

Compactness combined with the compatibility of an 18 V battery. Ideally suited for all applications with up to 6 mm screws. All 18 volt lithium-ion battery packs fit on the TXS 18 (except for the Ergo battery pack).

Impressive performance

The TXS 18 also performs impressively when working with Forstner drill bits up to 35 mm and screws up to 6x240 mm in softwood.

Optimal lighting

With the integrated LED light, you can work precisely even in dark corners - continuous lighting, afterglow or LED off can be controlled via the adjusting wheel. The brightness and duration of the afterglow can also be personalised via the Work App.

Everything is close to hand in an instant

Not just always at your fingertips, but also keeps your hands free at the right moment: The belt clip can be positioned for right and left handed individuals.

**Bits always at hand**

The practical integrated bit holder provides space for multiple bits - magnetically secured against falling out.

**CENTROTEC tool chuck - for even more speed at construction sites**

For instantly changing between drilling, countersinking and screwdriving: The CENTROTEC tool chuck, which has proven itself since 2001, is a chuck and bit holder in one. For use with numerous CENTROTEC accessories. Even though it is half the size and weighs 80% less than a standard chuck: A real Festool invention with the usual Festool quality.

**Unique system width and perfect system compatibility**

Owing to the smart FastFix interface, all attachments of the current 18 V screwdriver are compatible with the TXS 18. No other compact screwdriver has such varied possible uses!

**In the smallest of spaces**

The angle attachment is perfect for work around corners and reaching concealed screws at tight angles. Bits can also be inserted into the direct holder of the spindle in narrow spaces.

**Chuck for standard tools**

The chuck with a standard width of up to 10 mm is always included in the scope of delivery - for all tools with a cylindrical shaft. Tool-free mounting via the FastFix interface.

**Work comfortably**

Also comfortable for overhead work thanks to perfect ergonomics and low weight.

**Amazingly powerful**
