hello@beyondtools.com

Water cooled sharpening

Tormek T-4 is an enhancement of the T-3 model taking the precision and stability to a completely new level. Vital functions like the motor and the main shaft are mounted in the zinc cast top, which also includes integrated sleeves for the Universal Support. This advanced design ensures an unbeatable precision for the Universal Support, which control all jigs and accessories.

Grinding wheel for both coarse and fine sharpening

Like the larger Tormek models, the T-4 is equipped with the Tormek Original Grindstone. It is optimized to combine efficient steel removal, smooth surface finish and a long life. With the included Stone Grader, you can alter the stone surface from 220 grit to about a 1000 grit surface, giving you two different sharpening qualities in one stone.

Sharpen chisels, knives, scissors, carving tools and more

The T-4 is well suited for sharpening chisels, knives, scissors, and smaller tools like carving tools. It also works with turning tools and drill bits. For sharpening planer blade knives (with SVH-320) and moulding knives (with SVP-80) we recommend one of the larger Tormek machine models. Note that a few shapes of gouges cannot be honed with the SVD-186 R Gouge Jig on the leather honing wheel due to the compact size of the Tormek T-4. These tools can be honed freehand instead.

The motor is rated for 30-minutes continuous use at a time. That is usually more than enough for the house need, but if you sharpen more we advise you to take a look at Tormek T-8 which can run continuously.

Configure the Tormek T-4 with your choice of grinding jigs according to the tools that you are to sharpen (sold separately).

With the sleeves for the Universal Support now being cast in the zinc top, together with the new Tormek stadium shaped design of the holes (patent pending) - the precision has been improved by 300 % compared to T-3.

The handle makes the machine easy to move and position. So you are not tempted to make the mistake and try to lift the machine with the Universal Support.

Vital parts like the motor and the main shaft are integrated with the zinc cast top.

The machine plate is now made of metal, which makes it a convenient place to store the Tormek AngleMaster (which has magnetic feet).

Features

Complete Water-Cooled Sharpening system for Wood Chisels, Plane Irons, Spoke Shaves, Carving Tools, Lathe Turning Tools, Knives, Axes and most edge tools

Accessories Jigs available to assist you in achieving a better than factory blade edge quickly

Includes complete instruction manual and easy to follow instructional videos for achieving professional tool sharpening results

Dual Grit Sharpening Stone turns and at just 120 RPM to ensure your blade does not overheat and the steel lose its temper

Die Cast Zinc top, Impact resistant ABS plastic, Industrial Quality Motor, Stainless Steel Hardware for long life, backed

hello@beyondtools.com

by 7 year warranty, made in Sweden

Machine plate in metal:-

Which makes it a convenient place to store the Tormek AngleMaster (which has magnetic feet). Scale for stone diameter

Stone Grader included :-

Regardless of what tool you will sharpen you will need it, so we decided to include it from the start. Make sure to use it and you will always have a fresh cutting stone. Also, with the Stone Grader you get two different cutting actions (fast/fine) out of your grindstone!

Handle for easy movement:-
