Shipping Weight (Gross)	1.48 kg

Traditional Anvil Secateur PG138-22-F by Bahco These are highly suited for Viticulture, Pomology and Landscaping. Anvil Secateur designed for cutting mature and dry wood.

Specifications:-

Cutting Capacity: 20mm

Steel handle

Pruning Tips:- Make your pruning cut, at an angle, approximately half an inch from a bud (if possible with the lopper blade towards the tree). Cut at an angle that will direct excess sap and moisture away from the chosen bud. Choose a bud which will grow in the direction you want the plant to develop. Pruning during the dormant period, in autumn and winter, will encourage vigorous new growth during the next growing season. Pruning during spring and summer will inhibit growth.
