10-1000V DUAL RANGE VOLTAGE DETECTOR 2203-20 BY MILWAUKEE

SKU	Option	Part #	Price
9303049		2203-20	$55

Model	
Type	Voltage Testing
SKU	9303049
Part Number	2203-20
Barcode	045242334056
Brand	Milwaukee
Dimensions	
Product Length	150 mm
Product Height	23 mm
Features	
Standard Inclusions	1 x AAA Battery
Packaging + Shipping	
Shipping Weight (Gross)	1.48 kg

The MILWAUKEE 10-1000V Dual Range Voltage Detector is the first Non-Contact Voltage Detector with the ability to light up, detect, and differentiate automatically. The expanded sensitivity range of 10-49V offers the ability to detect voltage in common systems that would normally go undetected when using a standard voltage detector. These systems include: LED Lighting, Fire Detection & Suppression Systems, HVAC Controls, and Security & Access Controls, along with many others. The 10-1000V Dual Range Voltage Detector not only detects, but also differentiates 10-49V from the standard voltage range of 50-1000V. It does so by using a uniquely colored LED indicators and audible tones, delivering the clearest indication of these two voltage ranges. A built-in LED work light allows for increased visibility in low-lit areas, and automatic shut-off after 5 minutes helps preserve battery life. The 10-1000V Dual Range Voltage Detector is a best-in-class voltage detection solution for any Electrician, HVAC Technician, or Facilities Maintenance Technician. **Features:-**
Automatically differentiates 10-49V and 50-1000V
Different colours identify voltage range
Built-in LED work light
Auto-off
Pocket clip
Blade-tip for checking outlets
Constant power on LED indicator
