Air Delivery	3,900L/Min.
Packaging + Shipping	
Shipping Weight (Gross)	1.48 kg

The dust extractor for the PLANEX long-reach for PLANEX and

PLANEX Easy. **Features:**

Ideal for use on plasterboard

36L container capacity is perfectly designed for the extreme

material removal rates of the PLANEX long-reach sander

The dust extractor for the PLANEX long-reach and PLANEX

Easy Long Reach Sander

With a kink-resistant hose, and ComfortClean closing slide

fitted as standard for even more effective filter cleaning

Main Applications:-

Plaster and fine dust extraction

Automatic operation with power and air tools

Wet and dry extraction

Festool dust extractors are fitted with a circuit breaker for

safety when a connected load of 1200 watts is exceeded.

Some tools that draw higher wattage can trigger the circuit

breaker and if initiated requires the reset button above the

socket to be pushed in and reset. When requiring to use

larger wattage tools with dust extraction it is recommended

the tool is operated off a separate outlet and a Bluetooth

system can then be used to switch the dust extractor on and

off as required. When using tools it is recommended you

always use the correct consumable for best results as even

lower wattage tools can trip the circuit breaker if the system

isn't matched to the application. (e.g.: saw blade not

matched to material) **Technical Data:-**
