Permanent organisation and the best possible overview

All in one place

Simple, compact transportation

Main Features-

Everything included

All in one Systainer³: Two fastening clamps, one deflector, one angle stop, one KickbackStop, two connecting pieces and a splinter guard.

Simply better organisation

Systainer³ units offer a variety of ways improve organisation and provide an overview. Different size and height variants are available.

Safe limit

The KickbackStop functions as a limit stop or secures the circular saw against kickbacks when plunging into the workpiece.

No splinters

The rubber lip right at the scribe mark works as a splinter guard and prevents the edges from splintering even with

angled cuts.

Angle stop for precise cuts

The angle stop can quickly be attached to the guide rail without tools. Angles of -60° to $+60^\circ$ can be set easily and with precision.

Connect comfortably

Two guide rails can be conveniently connected and aligned using the connecting piece.

No getting caught

The deflector prevents the suction hose and cable from getting caught up on the end of the guide rail.

Secure grip

It is possible to attach fastening clamps to securely attach the workpiece.
