Brand	Arbortech
Country of Origin	
Manufactured in	Australia
Features	
Standard Inclusions	3 x 600G Sanding Discs
Packaging + Shipping	
Shipping Weight (Gross)	1.48 kg

The Arbortech *Contour Random Sander™* is a revolutionary attachment tool for sanding deep profiles, contours and detailed woodwork. The perfect alternative to sanding by hand and 'must have' for any woodworking project. The *Contour Sander™* is designed to fit the *Power Carving Unit™* or any standard 100mm (4") or 115mm (4 1/2") grinder.

MOULDS TO COMPLEX CONTOUR

The random orbital sanding action combined with patented flexible backing pad will help you create the perfect finish with no risk of scarring, scratching or blemishing the wood. The 3 1/6" (8cm) shaft provides access into deep hollows that would otherwise be impossible to reach.

NO SANDPAPER MARKS

The random orbital sanding action combined with the patented flexible backing pad creates a perfect finish without scars, scratches, or blemishes. This also preserves the sandpaper, getting more longevity out of each disc.

DEEP INTERNAL SHAFT

The 8cm (3 1/6") shaft transforms your standard angle grinder to allow standing in deep hollow and previously hard-to-reach places. The 50mm sanding grit makes the contour sander perfect for some of the smaller more delicate projects.

SMOOTH FINISH SANDING

The random orbital action as well the flexible backing pad make this sander responsive to whatever project you may be working on. Used with the finest grit, it provides a remarkably smooth finish ready for oiling or coating.

Includes:

- 1x *Contour Random Sander™* Attachment
- 1x Backing Pad
- 1x Allen Key
