Shipping Weight (Gross)	1.48 kg

Japanese Waterstone Suit T-3 200 x 50mm SJ-200 by Tormek The **Tormek SJ-200 Japanese Waterstone** is 4000 grit and delivers a mirror finish with hardly any visible marks. Since it is made to create the finest surface, it has a limited steel removal capacity and cannot be used for shaping a tool. It excels at sharpening hand tools like carving tools, knives, scissors, plane irons and wood chisels where a minimum of steel removal is needed and a superior surface finish is demanded. Its unique composition gives the stone an extremely long life. Since the surface left by the Japanese waterstone is so fine, we do not recommend honing afterwards on the leather honing wheel. Replacement wheel for Tormek machines with an 8 Inch wheel SJ-200: 200 mm Diameter Grit Size: 4000 Weight: 4.8 lbs Available for Tormek T-7, T-4, T-3, 2000, 1200
