Shipping Weight (Gross)	0.0 kg

About this item:

British Standard Pipe (BSPF).

Split circular chrome alloy button dies are most commonly used in conjunction with a die stock handle.

They can be used as thread chasers to clean an existing thread.

They can also be used to create a new male thread on non-ferrous metals and plastics.

Chrome alloy dies are not suitable for creating precision, safety or critical threads.

BSPF (G Series) is a pipe thread which is used mainly for mechanical coupling.

The angle of thread is mainly 55° however for the US method some threads have a 60° angle.

It is specified according to JIS and ISO R228.
