Size	250mm (10")
Technical - Main	
Teeth	15TPI
Country of Origin	
Manufactured in	Sheffield, England
Packaging + Shipping	
Shipping Weight (Gross)	1.48 kg

The Pax 1776 Saw, Thomas Flinn’s finest tenon saw is a must have for all woodworking enthusiasts who appreciate premium saws.

Made with a heavily folded brass back roll marked with “Pax 1776 Sheffield England”, it is made as a celebration piece commemorating the start of Pax saws here in Sheffield, England. They are made today to the same high standards they were two hundred years ago. The folded brass back means the blade is held under tension offering excellent rigidity and balance. The weight of the brass back aids the fine cutting ability of this saw. The traditional open handle is made from Walnut and has solid brass split nut screws and a medallion. It is given a satin finish and offers the perfect comfort and grip. This saw is the ultimate in beauty and also in it’s unrivalled performance. These saws are all tested before despatch.

Available in lengths 8”, 10” (Standard) and 12” in a choice of 13tpi or 15tpi, in either Rip (for cutting with the grain) or Crosscut (for cutting across the grain) formation. This saw is a fantastic gift for the woodworker.

Blade depths are as follows:

8” Blade length = Blade depth 2”

10” Blade length = Blade depth 2”

12” Blade length = Blade depth 2 1/2”

Rated 4/5 stars by Good Woodworking magazine!

Please note these are hand crafted products - not machine manufactured, therefore perfectly imperfect and unique
