235MM (9-1/4") X 20MM X 40T CIRCULAR SAW BLADE SUIT FINE FINISHING 48408926 BY MILWAUKEE

MILWAUKEE's wood cutting circular saw blades maximise life and cutting efficiencies to improve your productivity. An anti-friction coating keeps the blade cool while cutting and resists corrosion & gumming. Laser cutting technology creates the blade from 100% sheet steel to ensure a stable blade that increases cutting accuracy. Laser cut vibration slots minimise wobble and warping during use. A thin kerf design delivers faster cuts as well as more cuts per charge when using a cordless tool. Finally, MILWAUKEE Fine Finish blades include Anti-Friction Coating, Cobalt Infused Carbide teeth, Laser Cut Technology as well as an ATB tooth pattern for a cleaner, more accurate cut.. **Features:-**

Anti-Friction Coating for cooler cuts whilst resisting drag, corrosion and gumming.

Cobalt Infused Tungsten Carbide extends the cutting life and maintains the tip sharpness.

Laser Cut Vibration Slots minimise wobble and warping.

ATB Tooth Pattern minimises tear out.

Universal Arbor System includes reduction rings to fit most circular saws.

Optimised for corded and cordless performance.
