

184MM (7-1/4") X 20MM X 4T CIRCULAR SAW BLADE SUIT FRAMING 48409000 BY MILWAUKEE

MILWAUKEE's fibre cement cutting circular saw blades maximise life and cutting efficiencies to improve your productivity. An anti-friction coating keeps the blade cool while cutting and resists corrosion & gumming. Laser cutting technology creates the blade from 100% sheet steel to ensure a stable blade that increases cutting accuracy. Laser cut vibration slots minimise wobble and warping during use. A thin kerf design delivers faster cuts as well as more cuts per charge when using a cordless tool. Finally, MILWAUKEE PCD blades are designed with low tooth count to reduce dust compared to continuous rim blades. **Features:-**
Anti-Friction Coating for cooler cuts whilst resisting drag, corrosion and gumming.
Polycrystalline Diamond Teeth extends the cutting life and maintains the tip sharpness.
Laser Cut Vibration Slots minimise wobble and warping.
Universal Arbor System includes reduction rings to fit most circular saws.
Optimised for corded and cordless performance.
